EDUCATION

·Carnegie Mellon University **Aug 2026 – May 2028**

Master of Entertainment Technology

·University of Washington **Sep 2022 – June 2026**

B.S. Applied Computational Mathematical Science: Scientific Computing. & Numerical Algorithm

Experience

Perfect World (Shanghai Site) **June 2025 – Sep 2025**

Steam CN QA Department Intern

- *Wrote APP test cases, do integration testing, API testing, tracking point testing, and P-cap through Requable.*
- *Did APP performance testing, auto interface testing and so on.*
- *Participated in writing the tests for APP requirements, Backend API network analysis.*
- *Had meeting with developing engineers weekly for test requirements update.*
- *Learned how to use docker to unify the environment with developers to test APP*

PROJECTS

Submarine Tracking (UW):

- *Applied FFT to analyze 3D acoustic data and identify dominant signal frequency.*
- *Designed Gaussian filter in frequency domain to denoise high-dimensional data.*
- *Reconstructed object trajectory over time by locating maximum signal intensity.*
- *Visualized 3D and 2D motion paths, achieving stable tracking in noisy environments.*

Neural Network for Image Classification (FashionMNIST) (UW):

- *Implemented FCN using PyTorch. Trained model using SGD and Adam optimizers with cross-entropy loss.*
- *Improved test accuracy from 82.5% to 88.6% using Adam optimizer.*
- *Conducted experiments on initialization and batch normalization.*

2D Platformer Game (UW):

- *Learned and developed in the course of 2D game design & develop, published on itch.*
- *Gathered skills of using Unity, and C++ for developing games, familiar with using different 2D effect, like boxcollider, 2D rigidbody movement, etc. Understand their uses.*

https://dxiu.itch.io/final https://dxiu.itch.io/top-down-shooter-final

Adaptive Controller Game Develop (CMU):

Game Name: WOW COW

- *Worked as a programmer in team*
- *Design Game Mechanics & Intuitive controller, reform air pumps for controller inputs*
- *Wrote C# scripts in Unity for game structure manager & some UI design*
- *Did some simple animations in unity through keyframes*

VR Game Develop (CMU):

Game Name: Give Mummy a Hand

- *Design Game Mechanics & Story background*
- *Test and design game-unique handshape recognizer through meta building blocks*
- *Wrote C# scripts in Unity for game structure manager, audio manager, and scene managers.*
- *Did level design with teammates*

TECHNICAL SKILLS

Programming Language: *Python, Java, R, C++*

Software Proficiencies: *R Studio, IntelliJ, VS Code, Jupyter Notebook, Unity, Microsoft Suite, Matlab*
